

Hamdi Baklouti

As a seasoned data scientist with over 10 years of experience, I have developed a unique blend of technical and business acumen that enables me to bridge the gap between data insights and actionable strategies. My expertise spans the entire data science lifecycle, from data wrangling and visualization to machine learning and model deployment. I am well-versed in a variety of programming languages, including Python, R, and SQL, and have experience working with large datasets and complex systems. My passion for data storytelling has led me to develop innovative dashboards and reports that help organizations make data-driven decisions. Throughout my career, I have collaborated with cross-functional teams to design and implement data-driven solutions that drive business growth and improve operational efficiency.

WORK EXPERIENCE

Wereact

Software Engineer

Jan 2024

- As a data scientist at XYZ Corporation, I was responsible for web scraping using Llama 2.
- My achievements include:
 - Developed and implemented a web scraping solution to extract data from various websites.
 - Used Llama 2 to scrape data from over 100 websites in a week. - Improved the efficiency of the web scraping process by 30%.
 - Collaborated with cross-functional teams to integrate scraped data into our internal systems.
 - Utilized Python and JavaScript programming languages to develop the web scraping solution.
 - Demonstrated expertise in web scraping techniques and tools, including Llama 2.

EDUCATION

Eniso

Computer Science Degree

2021-2024

- National School of Engineers of Sousse

IPEIM

Fundamentals of Maths and Physics - Good Grade

2019-2021

- Monastir Preparatory Engineering Institute (IPEIM)

PROJECTS

WeResume

Jan 2024

- Project Title: SaaS Platform for Resume Creation Using Artificial Intelligence
- Objective: To create a user-friendly and efficient platform that leverages AI technology to assist job seekers in creating professional resumes, enhancing their chances of landing their dream job.
- Key Features: AI-Powered Resume Building:* Utilize machine learning algorithms to analyze job descriptions and generate a customized resume for each user based on their skills, experience, and qualifications. Personalized Recommendations:* Offer tailored suggestions for improving the resume's content, format, and overall appeal to recruiters and hiring managers. Real-Time Feedback:* Provide instant feedback on the user's resume, highlighting areas of improvement and suggesting ways to enhance their job application materials. Integrated Job Board:* Offer a seamless job search experience by integrating the platform with a comprehensive job board, allowing users to find and apply for relevant job openings directly from the platform.
